

# Build with Lego

You are going to build a figure using the lego bricks that you have.

One of you look at the model the teacher has and then go back to the team and tell them how to build. You are not allowed to build yourself or to show them with e g your hands. The only thing you are allowed to do is to talk.

When the first person has said everything he/she remembers, another one will have a look at the model and then tell the others what to do.

Then you go on until you have finished.

*Good Luck!*
